**EDISON ANNOUNCES
LATEST INVENTION**

New York, May 23.—Thomas A. Edison at 6 announces the completion and perfection of his latest invention, the tele-scribe, a combination of telephone and phonograph, by which telephone conversations may be perfectly recorded on a wax record, though the persons conversing be 300 miles apart. The completion of the tele-scribe gives Edison the credit for more than 1500 inventions, or more patents than ever issued to any other individual.

As a result of the invention of the tele-scribe, "canned evidence" may now be presented to a jury. A man cannot deny his own voice and his own words recorded on a phonograph may be adduced in court.

The tele-scribe is an electrical arrange-

ment consisting of a sensitive telephone for desk use with controlling buttons to operate a special recording machine placed near by. It is so sensitive that it will receive the same impressions of sound as the human ear, the slightest vibration being recorded. The sounds sent both ways are recorded on a cylinder record.

**MEN IN DEMAND BY
ARMY AND EMPLOYER**

London, May 23.—Employers and the army are rivals in the quest for men. Sir George Pragnell, chairman of the National Patriotic association, said today:

"The attitude of many government offices, banks, business houses and Tories is detrimental to recruiting and thousands of willing men as a consequence are more or less shirkers by compulsion."

The association is attempting to have employers of labor sign a pledge to give ex-soldiers the preference for positions after the war.
